BUILT TO CUT COST PER MILE

Premium FLX7000 Friction Compound

FleetX Air Disc Brake Pads are engineered from premium-grade FLX7000 friction compound — formulated to exceed most OEM pads in performance and durability across buses, trucks and trailers. Every compound decision balances one equation: stopping power, comfort and drivability, under every temperature and load condition a fleet will face.

QUIETER BRAKING, MAXIMUM SERVICE TIME

Our most popular pads use an advanced Hooked Style Backing System — purpose-built hooks that lock the friction material to the backing plate and eliminate shearing or separation. The result is a quieter pad that isn't replaced prematurely due to excessive noise.

COMPLETE, READY-TO-INSTALL KITS

Every FleetX pad kit ships complete with OE-quality hardware — four pads and the fasteners your technicians need, so a job started is a job finished. No parts-counter delays, no second trip to the shelf.
